MapmyIndia™

DON'T PANIC

USER MANUAL

A Turn by turn Navigation System for GPS Devices by MapmyIndia

CONTENTS

Introduction

First things first: thanks for buying MapmyIndia DON'T PANIC. We appreciate your business and commend you on your choice. We put a lot of thought and effort into making a great navigation app, and you immediately recognized it as the masterpiece that it is… or you just saw the price tag and said, "Wow! That's super cheap for an on-board, turn-by-turn navigation app! Gimme! Gimme!" Either way, you're here now,reading the user manual to figure out how to use the app. So, without further ado, let's get started!

Tips for Reading Manual

Take Me Home ➔ Cancel Current Route ➔ Yes. You'll see sentences like these in Part 2 of the User Manual. This shortened formulation represents much lengthier instructions that tell you to open multiple nested screens in sequence, i.e., "Tap the Take Me Home button. On the following screen, tap Cancel Current Route. On the screen after that, tap Yes."

Quick Start

Simple Search and Navigation
You've now started the app and want to get to a certain address. Here's a quick, super-basic way to start navigating immediately.
Finding and Navigating to a Destination

❶ Tap the Search button on the Control Bar. ❷ Enter the address in the What field. ❸ Tap the Get Search Results button. ❹ Tap on the Search Result. ❺ Tap Navigate To and you will be automatically guided from your present GPS location to your selected destination.

Part 1
Getting the Started

Or: What the Heck Do All These Icons, Buttons and Fields Mean?

At this point you've probably already opened the app, eagerly tapped several buttons and are now staring blankly at a bunch of unfamiliar icons.Relax. This is the part where we show you what all the nifty little buttons,icons, bars and fields mean. We'll also go through and define some basic terminology (with pictures!) to make things easier to understand.

Touch Gestures

Using Touch Gestures in Map View

Tap

Use your fingers to manipulate the map and page views in the app.

Selecting an Item: Tap the screen surface once with a fingertip to select a button on the Control Bar, a map icon, etc.

Drag

Panning the Map: Move or quickly brush your fingertip across the screen surface to pan across the map.

The Intertia Pan feature enables your pan come to a smooth, gradual stop as opposed to an unnatural abrupt one.

Zooming In : Touch and continue pressing a point on the map with a fingertip to zoom in the view.

Using Touch Gestures in Menu Pages

Selecting, Deselecting and Toggling an Item: Tap the screen surface once with a fingertip to select a button, tab, list, deselect or toggle an applicable item

Scrolling a Page: Move or quickly brush your fingertip up and down the screen surface to scroll up and down a page.

The Intertia Pan feature enables your scroll to come to a smooth, gradual stop as opposed to an unnatural abrupt one.

The Map View

This is the first screen you'll see once the app starts. Your device GPS will tell the app where you're at and you'll see your location. This is the app's default start screen and it's called Map View.

The Control Bar

The GPS Signal Strength Indicator

The Current Speed indicator

The Clock Display

The Battery Level Indicator

The Status Bar (In Portrait Mode)

The Search Button

The Volume Button

The Main Menu Button

The Last Page Accessed Field / Map View
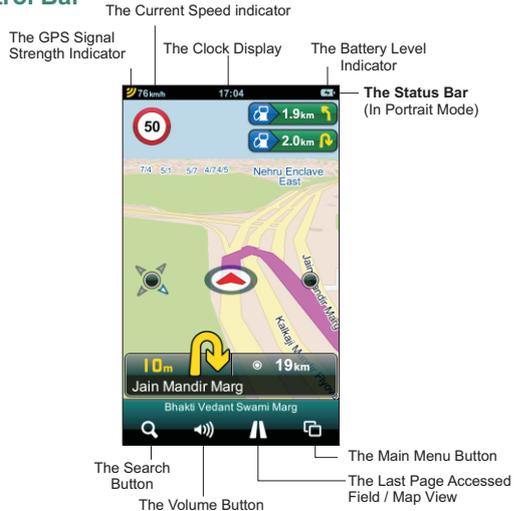

Located along the bottom of your screen in Portrait mode, the Control Bar features the Search button, the Volume button, the Last Page Accessed field, the Main Menu button. In Landscape mode it is combined with the Status Bar and features the GPS Signal Strength indicator, the Current Speed indicator, the Clock display and the Battery Level indicator as well.

The Volume Button

The GPS Signal Strength Indicator

The Battery Level Indicator

The Main Menu Button

Bhakti Vedant Swami Marg

72 km/h   17:04

The Search Button

The Current Speed indicator

The Clock Display

The Last Page Accessed Field / Map View

The Control / Status Bar (In Landscape Mode)

The Search Button. Tapping the Search button takes you immediately to the Search page. The Search button is always present on the Control Bar no matter where you are in the app. Tap it from anywhere in the app to go directly to the Search page. You can instantly return to the Map View by tapping the Close tab in the upper right corner of the Search page

The Volume Button : The volume buttons enables you to adjust the navigation volume

The Last Page Accessed Field / Map View Button. This field displays the tappable menu category button of the last Main Menu category page you accessed. Tapping it will take you to that menu category page.

When you are in a Main Menu category page, the Last Page Accessed field switches the Map View button which takes you instantly back to your previous Map View

> 💡 This is a great tool for toggling quickly between the current Main Menu page and Map View.

The Main Menu Button. Tap the Main Menu button to access the Main Menu page where you can access the Take Me Home, Route Options, Favorites, History and Settings buttons. Return to the Map View by tapping the Map View button on the Control Bar or exit the application completely by tapping the Exit 📇 Application button on the Control Bar.

The Status Bar
The Status Bar is located along the top of your screen in portrait mode. It features the GPS Signal Strength indicator, the Current Speed indicator, the Clock display and the Battery Level indicator. In Landscape mode, it's combined with the Control Bar along the bottom of the screen.

→**The GPS Signal Strength Indicator.** This displays your PND's GPS signal strength. Three yellow bars indicate the maximum GPS signal strength (within a 5 meter accuracy). Fewer yellow bars indicate a progressively weaker, less accurate, GPS signal. Three red bars indicate the absence of a usable GPS signal.

The Current Speed indicator. This icon indicates your vehicle's current speed.

The Clock Display. This one shows you the current time.

☞ **The Battery Level Indicator.** It lets you know your device's current battery level. A lightning bolt inside the battery icon indicates that the battery is being charged. A red battery icon warns you that you're nearly empty. A completely dark screen probably means you forgot to charge your battery last night !

The Smart Orientation Button and Menu

The Smart Orientation Button → The Smart Orientation Menu

Tap the Smart Orientation Menu button once to access the Smart Orientation menu.

The Rotation Mode Button. Tap the Smart Orientation Menu button once to access the Smart Orientation menu. Tap the Rotation Mode button to toggle between Panning and Rotation modes.

The Panning Mode Button. Tap the Smart Orientation Menu button once to access the Smart Orientation menu. Tap the Panning Mode button to toggle between Panning and Rotation modes.

The 2D Mode Button. Tap the Smart Orientation Menu button once to access the Smart Orientation menu. Tap the 2D button once to toggle between a two-dimensional (aerial) map view and a threedimensional (depth-perspective) map view.

The 3D Mode Button. Tap the Smart Orientation Menu button once to access the Smart Orientation menu. Tap the 3D button once to toggle between a three-dimensional (depth-perspective) map view and a two-dimensional (aerial) map view.

The Show North Button. Tap the Smart Orientation Menu button once to access the Smart Orientation menu. Tap the Show North button to instantly rotate your map view so that north is at the top of your screen.

The Select Place On Map Button. Tap the Smart Orientation Menu button once to access the Smart Orientation menu. Tap the Select Place On Map button, then press and hold any point on the map. A street address, street name or GPS coordinates will appear in the Map Selction Point Name button. Tap on the Map Selction Point Name button to view its Details /Route Planning and Options Page where you can view the locations full information, navigate to it, add it as a destination, set it as your start point, find the closest point of interest, add it to your favorites or set it as home. Close the Details / Route Planning and Options Page by tapping the Close tab.

The Smart Zoom Button and Multi-zoom Menu

The Smart Zoom Button

Zoom In / Zoom Out Buttons

Auto zoom Button
Preset 1
Preset 2
Preset 3
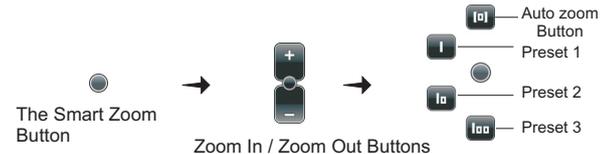

In the Map View mode, tap the Smart Zoom button once to access the basic Zoom In / Zoom Out function. Tap or continuously press the Plus button to zoom in for a more detailed map view. Tap or continuously press the Minus button to zoom out for a wider map view. Tap on the Smart Zoom button again to access the Multi-zoom menu.

The Block View / View Preset 1 Button*. Once you're inside the Multi-zoom menu, tap on the Block View / View Preset 1 button to instantly switch the current map view of your present GPS location to an even closer 3D view of a block within a city, town or village around your GPS location. All street names are displayed.

→ **The Area View / View Preset 2 Button***. When you're in the Multi-zoom menu, tap on the Area View / View Preset 2 button to instantly switch the current map view of your present GPS location to a closer 3D view of an area, or neighborhood within a city, town or village around your GPS location. Main thoroughfare and highway names are displayed.

→ **The City View / View Preset 3 Button***. From the Multi-zoom menu, tap on the City View / View Preset 3 button to instantly switch the current map view of your present map view to a broad overview of your GPS location. You'll see the entire city, town or village and its surrounding settlements. Main highway and road names leading to and from the locations are displayed.

Learn how to create custom view presets in the Creating Smart Zoom Menu Presets section on page 35.

The Auto Zoom Button. After you've accessed the Multi-zoom menu, tap on the Auto Zoom button to switch the map view of your current GPS location back to the 3D/2D Auto Zoom View. The Auto Zoom View function is the default map view mode, which is essentially a relatively close 3D street view that switches automatically to a 2D aerial view when you approach a large intersection or roundabout (for better navigating clarity), and then switches back to the 3D view once you've passed it.

Map View Location Icons and Buttons

Your Current Location Icon. This icon represents your current GPS location in Map View.

No GPS Signal Location. This icon represents a current lack of GPS signal. It signifies the last point on the map that the application registered your GPS signal

Your Current Location Finder Button. Any time you are away from your current GPS location in Map View, the Current Location Finder button appears in the middle of the lower half of the screen. Tap on it once to instantly see your current location in Map View.

Okhla Industrial Estate

The Start Point Icon   The Start Point Name Button

The Start Point Icon. The Start Point icon represents your trip starting point in Map View. Tapping the Start Point icon once transforms it into the Start Point Name button. You can tap on the map to return the Start Point icon.

The Start Point Name Button. The Start Point Name button shows your trip starting point's name in Map View. Tapping the Start Point Name button takes you to the item's Details / Route Planning / Options page. Tap the Close tab to return to the Start Point Name button in Map View. You can tap on the map to return the Start Point icon.

Mathura Road

The Destination Icon   The Start Point Name Button

The Destination Icon. The Destination icon represents your trip destination in Map View. Tapping the Destination icon once transforms it into the Destination Name button. You can tap on the map to return the Destination icon.

The Destination Name Button. The Destination Name button shows your trip destination's name in Map View. Tapping the Destination Name button takes you to the item's Details / Route Planning / Options page. Tap the Close tab to return to the Destination Name button in Map View.

You can tap on the map to return the Destination icon

The Via Point Icon   1   2   New Friends Colony

Additional Via Point Icon   The Via Point Name Button

The Via Point Icon. The Via Point icon represents a programmed stop along your trip route in Map View. Tapping the Via Point icon once transforms it into the Via Point Name button. You can tap on the map to return the Via Point icon.

The Via Point Name Button. The Via Point Name button shows your trip Via Point's name in Map View. Tapping the Via Point Name button takes you to the item's Details / Route Planning / Options page. Tap the Close tab to return to the Via Point Name button in Map View. You can tap on the map to return the Via Point icon.

Additional Via Points Icon. The Additional Via Point icon represents additional programmed stops along your trip route in Map View. The numbers increase incrementally and chronologically as you add Via Points. Tapping the Via Point icon once transforms it into the Via Point Name button. You can tap on the map to return the Via Point icon.

The Map Selection Point Icon   Civil Lines — The Map Selection Point Name Button

The Map Selection Point Icon. The Map Selection Point icon represents a location you've chosen by tapping the Map Selection Point button in the Smart Orientation menu and pressing a point on the map in Map View. Tapping the Map Selection Point icon once transforms it into the Map Selection Point Name button. You can tap on the map to return the Map Selection Point icon.

The Map Selection Point Name Button. The Map Selection Point Name button displays the name and location of the map point you've chosen by tapping the Map Selection Point button in the Smart Orientation menu and pressing a point on the map in Map View. Tapping the Map Selection Point Name button takes you to the item's Details / Route Planning / Options page. Tap the Close tab to return to the Map Selection Point Name button in Map View. You can tap on the map to return the Map Selection Point Icon.

The Favorite Place Point Icon   Lodhi Road — The Favorite Place Point Name Button

The Favorite Place Point Icon. The Favorite Place Point icon represents the location of a Favorite Place in Map View that has not yet been defined as Start Point, Destination, Via Point or Home. Tapping the Favorite Place Point icon once transforms it into the Favorite Place Point Name Button. You can tap on the map to return the Favorite Place

Point icon.

The Favorite Place Point Name Button. The Favorite Place Point Name button shows you the name and the location of the Favorite Place in Map View. Tapping the Favorite Place Point Name button takes you to the item's Details / Route Planning / Options page.
Tap the Close tab to return to the Favorite Place Point Name button in Map View. You can tap on the map to return the Favorite Place Point icon.

> If you choose any of the options in the Route Planning Bar (Navigate To, Add As Via Point, Add as Destination, Set As Start on the Details / Route Planning / Options page, the Favorite Place Point Name button will change into the corresponding type of button once you're back in Map View.

The Search Result Point Icon.   Connaught Place — The Search Result Point Name Button

The Search Result Point Icon. The Search Result Point icon represents a search result's location in Map View that has not yet been defined as a start point, destination, via point or home. Tapping the Search Result Point icon once transforms it into the Search Result Point Name button. You can tap on the map to return the Search Result Point icon.

The Search Result Name Point Button. The Search Result Point Name button displays your search result's location and name in Map View. Tapping the Search Result Point Name button takes you to the search results's Location Details / Route Planning and Options page. Tap the Close tab to return to the Search Result Point Name button in Map View. You can tap on the map to return the Search Result Point icon.

> If you choose any of the options in Route Planning Bar (Navigate To, Add As Via Point, Add as Destination, Set As Start on the search result's Location Details / Route Planning and Options page, the Search Result
> Point Name button will change into the corresponding type of button once you're back in Map View.

Page View Buttons and Icons
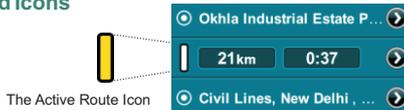

The Active Route Icon

The Active Route Icon
 The Active Route icon on the Route Details bar indicates that your are currently, actively navigating that route (Active route details and options can be viewed by tapping the Route option in the Last Page Accessed field on the Control Bar in Map View or on the Main Menu page.)

The Inactive Route Icon
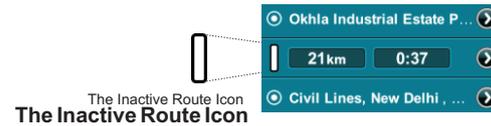

The Inactive Route Icon
 The Inactive Route icon on the Route Details bar indicates that your are currently not navigating that route (Inactive route details and options can be viewed by tapping the Route option in the Last Page Accessed field on the Control Bar in Map View or on the Main Menu page.)

The Pause/Resume/Record Route Button. Tapping the Pause/Resume/Record Route button on the Trip Display bar lets you pause and resume a navigation session (The Trip Display bar can be viewed by tapping the Route button in the Last Page Accessed field on the Control Bar in Map View or on the Main Menu page.) You can record and save any route you drive by first exiting any navigation sessions, then Route ➙ Pause/Resume/Record Route.

The Favorite Place Button

The Priority Favorite Place Button

The Favorite Place / Priority Favorite Place Button. The Favorite Place button appears as a blue-outlined star next to any address when viewing it's details. You can tap on the Favorite Place button next to the address to turn it into a Priority Favorite Place which is now represented by a solid yellow star. This means that the address will now be placed at the top of your Favorite Places list.

The Map Locator Button

The Map Locator Button. The Map Locator button is always displayed next to addresses, points of interest (POI) or GPS coordinates in both the summarized info and fully-detailed info display modes. Tap on the Map Locator button to instantly view that item's location in Map View.

The Home Icon

The Home Icon
The Home icon is located next to an address in both the summarized info and fully-detailed info display modes and it represents the item that you've designated as Home. This can be your actual home address, your work location, your hotel while on holiday, etc. You can set an address as home by tapping the Set as Home button on its Details / Route Planning / Options page. You need to have this option set to use the Take Me Home button in the Main Menu.

Part 2
Using the Application

Or What happens when I press this?

Using Search
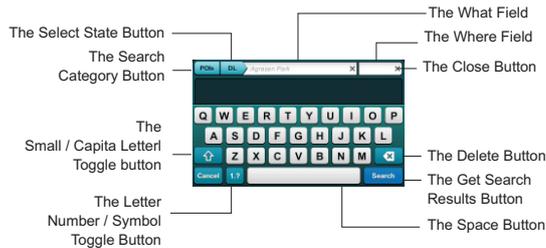

The Select State Button
The Search Category Button
The Small / Capita Letterl Toggle button
The Letter Number / Symbol Toggle Button

The What Field
The Where Field
The Close Button
The Delete Button
The Get Search Results Button
The Space Button

The Search button (🔍) is always present on the Control Bar no matter where you are in the app. Tap it from anywhere in the app to go directly to the Search page.

The Cancel Button (In Landscape)

To return to the Map View, tap Close button in the upper right corner

Defining Search Categories

The Search Category is set by default to All. By tapping on the Search Category button, you can toggle between Streets, POI, Lon/Lat and all.

Selecting State

The default search state is the one your Map View is currently displaying.Tap the Select state button to go to the Select state page. Tap on the specific state you want to search. Tap the Close tab to save your selection and go back to the Search page.

Using the Letter/Number/Symbol Toggle Button

Tap the Letter / Number / Symbol Toggle button to toggle the keyboard inputs between letters, numbers and symbols.

Using the What Field

Tap in a name, street, address, POI or longitude coordinate in the What field using the keyboard. A suggested result will appear in the Suggested Result area automatically as you type.

Using the Where Field

Tap in a city or town or latitude coordinate in the Where field using the keyboard to narrow your search even further

How to Delete a Single Space

Tap the Delete Space button to delete a single letter, number or space in either the What or Where fields.

How to Clear the Search Fields

Tap the Clear Field button (x) in the What or Where fields to delete the entire contents of either the What or Where field.

How to Get a Complete List of Search Results

Tap the Get Search Results button at any point in your search to hide the keyboard and display a complete list of search results

How to Narrow Your Search Results and View Their Details

While viewing the results list, you can narrow your search even further by tapping the Search Category button to toggle between Streets, POI, Lon/Lat and All. Tapping directly on a Search Result will show its Location Details / Route Planning and Options page.

How to See a Search Result in Map View
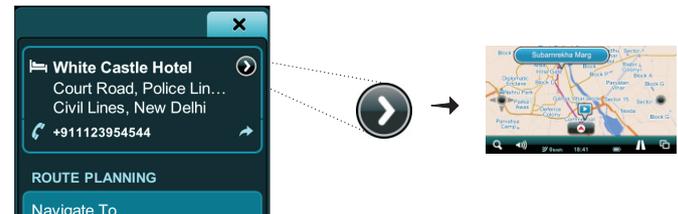

Tap on the Map Locator button to instantly view your search result's location as a Search Result Name Point button in Map View

How to Reveal the Keyboard

As your search results are being displayed, tap on the What or Where field to reveal the keyboard again.

How to Use the Location Details / Route Planning and Options Page

You Can Get to this Page in a Number of Ways

By tapping a Map View Location Name button or a Location Result on any page in the app, it will take you to the Location Details / Route Planning and Options page.

For example: From Map View: Location Icon ➜ Location Name Button

➜ Location Details / Route Planning and Options page or...

From the Search page: Search Result ➜ Location Details / Route Planning and Options page or...

From Favorites: Main Menu/ Control Bar ➜ Favorites ➜ Location ➜ Location Details / Route Planning and Options page… etc.

Using the Location Details Bar

The Location Details bar displays your location's full address, POI icon, GPS coordinates and other details (if available) like phone numbers.

Map Locator ➜ Location in Map View.

Using the Route Planning Bar

Depending on whether your selected location is undefined, previously defined (as a Destination, Start Point, Via Point or an undefined Search Result or Map Location Point), or if it is already part of a currently active or saved route, the Route Planning bar presents you with a variety of active and inactive buttons:

Navigate To: instantly begins guiding you to the selected location from your current GPS location.

Remove from Trip: removes the selected location from your current route.

This option appears only after the selected location has been set as a start point, via point or destination.

Add as Via Point: adds the selected location to your current route as a via point.

This option appears only when you are adding a third (or higher) location to your trip route.

Add as Destination: sets the selected location as your destination or replaces a previous destination with the selected location.

Set as Start: sets the selected location as your start point.

Using the Via Point Order Bar

VIA POINT ORDER

Move before previous

Move after next

This bar only appears on the Location Details / Route Planning and Options page when there are three ormore locations on your trip route.

Move Before Previous: moves the selected location towards the beginning of your journey, i.e. just before the location preceding it.

Moving the selected location before your start point will make the selected location your new start point

Move After Next: moves the selected location towards the end of your journey, i.e. just after the location following it.

Moving the selected location after your destination will make the selected location your new destination.

Using the Place Bar

PLACE

Find closest POI

Categories

Add name

Add to favorites

Set as home

Depending on whether your selected location is nameless, named, categorized, a favorite or set as home, the Place bar will be present with a number of buttons:

Find Closest POI: Find the closest Points Of Interest (POI) to your selected location. Find Closest POI ➔ Closest POI page - where nearby Points of Interest (hotels, petrol stations, restaurants, etc.) are automatically listed according to their proximity to your selected

location. Tap on a POI Location to go to its Location Details / Route Planning and Options page. To further refine your POI results: Select Category ➜ Select Category page where all POI are selected by default. Individually select and deselect or Deselect All categories. Close to go back to the, now modified, Closest POI page. Select Category will now reflect your POI selection preference (i.e. Petrol Station, Multiple, All, etc.)

Categories: Designate your selected location as Business, Family or friends

> - You can select multiple categories, one or none.
> - This option only appears after you've saved a location as a Favorite.

Add Name/ Rename: Add or rename and save a name for your selected location. Add Name or Rename ➜ Input Keyboard ➜ Tap in a new name ➜ Save ➜ Location Details / Route Planning and Options page. The new name appears in bold lettering as the top line of your selected favorite location.

> This option appears only after you've saved a location as a Favorite.

Add to Favorites: Add the selected location to your list of Favorites. Remove from Favorites: Remove the selected location from your list of Favorites.

> This option appears only after you've saved a location as a Favorite.

Set as Home: Set the selected location as Home.
Remove Home Address: Remove the Home designation from the selected location.

> This option appears only after you've saved a location as Home

Getting out of this Page

To exit the Location Details / Route Planning and Options page: Map Locator ➜ Map View or Close ➜ which takes you back to wherever it is that you came from (e.g., Route, History, Favorites, Map View, etc.)

Creating Smart Zoom Menu Presets

You can create up to three custom View Presets. First, in the Map View, zoom, tilt and pan the map view to your liking. Second, tap the Smart Zoom button twice to access the Multi-zoom Menu and press and hold the 100, 10 or 1 button for a few seconds.

The Save View bar will appear at the bottom of the screen asking you to confirm or disregard your choice. Tap the right sign button to confirm your choice or the Close button to exit without saving.

Restoring Defaults
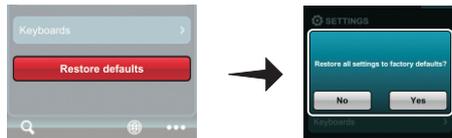

The Restore Defaults Button:

To restore the default City, Area and Block Views go Settings ➝ Restore Defaults ➝ Yes

> Selecting the Restore Defaults option will not only reset your Multi-zoom Menu, but will restore everything in the application to its original, factory setting.

Using the Main Menu:How to Get to the Main Menu and Where I Can Go from There.

Open the Main Menu Page by tapping the Main Menu button ( ).From here you can continue to the five main menu buttons (Take Me Home,Route, Favorites, History & Settings) or tap the Map View, Search or Close Application buttons on the Control Bar to go the corresponding screens and pages.
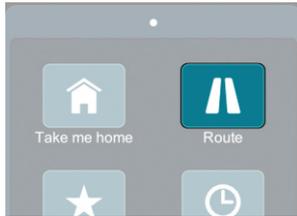

Using Take Me Home

Go Main Menu ➝ Take Me Home at any time to be guided from your current location to your previously designated Home location. If you are in an active navigation session, the Cancel Current Route window will appear. Select Yes to immediately start being guided to your Home location.

Using Route Options

The Trip page bars, buttons and displays covered in theUsing Route Options section are desribed as they would look if you've previously set a route with a Start Point, Via Point and Destination. If you need to set a route and don't know how, follow the the Quick Start and Simple Navigation instructions on page 3.

Getting to the Trip, Dashboard and Directions Page

Go Main Menu ➞ Route ➞ Trip page where you can view the Current Trip Status and Control bar, Current Route Details Display bar and the Route Options bar.

Go Main Menu ➞ Route ➞ Trip page ➞ Left tab ➞ Dashboard page

Go Main Menu ➞ Route ➞ Trip page ➞ Right tab ➞ Directions page

Using the Current Trip Status and Control Bar

The Current Trip Status and Control bar on the Trip page displays your estimated travel time, estimated route distance, actual travel time and actual travel distance. You can pause your navigation session at any time by tapping the Pause / Resume / Record Route button. You can also use the Current Trip Status bar to record your driving when you are not in an active navigating session by tapping the Pause / Resume / Record Route button once. Tap it again to pause the recording of your drive.

Navigate To

Here you can view your entire trip by stops and stages.
To see a location or portion of your route in Map View: Map Locator
→Map View
Tap on any Location to view its Location Details / Route Planning and Options page to access the following.

ROUTE PLANNING
Navigate to
Remove from trip
Add as via point
Add as destination
Set as start

So, Location → Location Details / Route Planning and Options page
Remove from Trip: removes the selected location from your current route.

This option appears only after the selected location has been set as a start point, via point or destination.
Add as Via Point: adds the selected location to your current route as a via point

This option appears only when you are adding a third (or higher) location to your trip route.

Add as Destination: sets the selected location as your destination or replaces a previous destination with the selected location.
Set as Start: sets the selected location as your start point.

Using the Via Point Order Bar

VIA POINT ORDER

Move before previous
Move after next

OK, we're still on the Location Details / Route Planning and Options page. Scroll down to the Via Point Order bar.
Move Before Previous: moves the selected location towards the beginning of your journey, i.e. just before the location preceding it.

Moving the selected location before your start point will make the selected location your new start point.

Move After Next: moves the selected location towards the end of your journey, i.e. just after the location following it.

Moving the selected location after your destination will make the selected location your new destination.

Using the Place Bar

PLACE

Find closest POI
Categories
Add name
Add to favorites
Set as home

And we're still on the Location Details / Route Planning and Options page. Scroll down past the Via Point Order bar to the Place bar. Depending on whether your selected Location is nameless, named, categorized, a favorite or set as home, the Place bar will be present with a number of buttons:

Find Closest POI: Find the closest point of interest to your selected location. Find Closest POI ➡ Closest POI page - where nearby Points of Interest (hotels, petrol stations, restaurants, etc.) are automatically listed according to their proximity to your selected location. Tap on POI Location to go to its Location Details / Route Planning and Options page.

To further refine your POI results: Select Category ➡ Select Category Page where all POI are selected by default. Individually select and deselect or Deselect All categories. Close to go back to the, now modified, Closest POI page. Select Category will now reflect your POI selection preference (i.e. Petrol Station, Multiple, All, etc.)

Categories � Choose Categories page ➤ Business, Family or Friends.
Now close Location Details / Route Planning and Options page.

> This option appears only when you are adding a third (or higher) location to your trip route.

> This option only appears after you've saved a location as a Favorite.

Add Name/ Rename: Add or rename and save a name for your selected location. Add Name or Rename ➤ Input Keyboard ➤ Tap in a new name ➤ Save ➤ Location Details / Route Planning and Options page. The new name appears in bold lettering as the top line of your selected Favorite Location.

> This option only appears after you've saved a location as a Favorite.

Add to Favorites: Add the selected location to your list of Favorites.
Remove from Favorites: Remove the selected location from your list of Favorites.

> This option only appears after you've saved a location as a Favorite.

Set as Home: Set the selected location as Home.
Remove Home Address: Remove the Home designation from the selected location.

> This option only appears after you've saved a location as a Favorite.

Using the Route Options Bar

Location Details / Route Planning and Options page ➤ Close ➤ Trip page. Scroll down to the Route Options Bar ➤ Type and Avoidance ➤ Route Type page.
Here you can select either Fastest or Shortest Route.

The Avoid bar lets you choose one, several or all avoidance options: Highways, Toll Roads, Unpaved Roads and Ferries.

> When available, a country or city-specific avoidance bar will appear below the the Avoid bar.

Close ➔ Route Options Bar ➔ Reverse Route to go back exactly the way you came. Your destination is now your start point and your start point is now your destination.

Save Route saves your route to your list of Favorite Routes. Scroll down to the bottom of the Trip page.

Start Shop Demo will begin a simulated turn-by-turn navigation session in Map View.

From the Map View Control Bar, tap Route in the Last Page Accessed field to go back to the Trip page.

Stop Shop Demo to stop the simulated turn-by-turn navigation session in Map View
From the Map View Control Bar, tap Route in the Last Page Accessed field to go back to the Trip page.
Delete This Route ➔ Yes removes the current route as your active navigation route, but does not remove it from your Favorites.

Reading the Dashboard

Speedometer
Precision GPS Signal Strength Indicator
Compass
Next Route Item
Current GPS Coordinates
Altimeter

Route ➔ Trip page ➔ Left tab ➔ Dashboard page
The Dashboard has no tappable buttons, but it tells you a lot of useful information. It features a speedometer, compass, altimeter, a precision GPS signal strength indicator and your current GPS coordinates.

Using Directions
Route ➔ Trip page ➔ Right tab ➔ Directions page
Here you can view your route directions as a list of turn-by-turn textual descriptions with corresponding descriptive icons in sequence, their corresponding Map View by tapping Map Locator next to them or
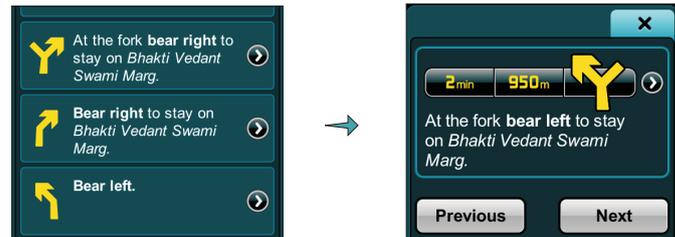

Individual Directional Description ➔ Individual Directional Description
Details page, which displays the descriptive icon, textual directional description, estimated time and distance to your next navigation instruction.

Map Locator ➞ Map View, where you can see the selected directional description or Next or Previous to view the next or previous directional description on its Individual Directional Description and Details page or Close to go back to the Directions page.

While in the Route pages, you can tap the Map View button on the Control Bar at any point to return to the Map View. Tap the Search button on the Control Bar at any point to go to the Search page. Tap the Main Menu button on the Control Bar at any point to return to the Main Menu.

Using Favorites
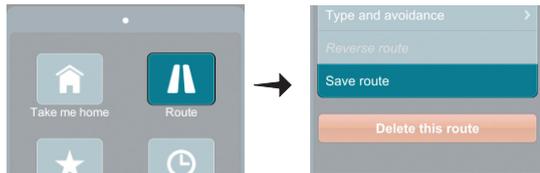

Creating a Favorite Place

From Search: Tap on any Search Result or Map View Location to view its Location Details / Route Planning and Options page. Scroll down to the Place bar and tap Add To Favorites.

From Map View ➞ Location Icon ➞ Location Name button ➞ Location Details / Route Planning and Options page. Scroll down to the Place bar and tap Add To Favorites.

Creating a Favorite Route

Once you've created a route, you can save it as a Favorite Route: Main Menu ➜ Route ➜ Save Route

Getting to the Favorite Places and Favorite Routes Pages

Go Main Menu ➜ Favorites ➜ Places

Go Main Menu ➜ Favorites ➜ Places ➜ Right tab ➜ Routes

Using Favorite Places
Here you can view your favorite places in the order that you saved them. You can bring a favorite to the top of the list by tapping the blue-outline star Favorite button, turning it into a solid-yellow star Priority Favorite button. You can toggle between the Favorite and Priority Favorite button by simply tapping on it.

Tap on Select Category to go the Select Category page where you can narrow your favorite places list according to Business, Family or Friends. Tap Close to go back to the Places page. The Select Category button will read All, Business, Family or Friends, depending on what you've chosen as your display criterion.
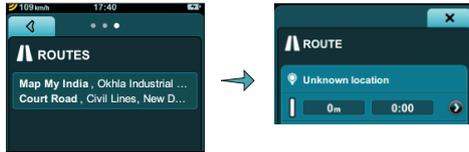

Tap on a Location itself to go to its Location Details / Route Planning and Options page.

Please refer to pages 29–40 to view how to use the Location Details / Route Planning and Options page.

Tap the Map Locator next to a favorite place to see it in Map View.

Using Favorite Routes

Tap on a Favorite Route to view it in the Route page where you can see the Route's Details Display bar, which shows you your start point, via points and destination. It also shows the estimated route distance and estimated travel time between each stop. The Navigation indicator shows you that your route is currently inactive (white)

By tapping the Map Locator button next a location you can instantly view the chosen location in the Map View.

In Map View tap Favorites in the Last Page Accessed field on the Control Bar to go back to the Route Details Display bar on the Route page.

By tapping the Map Locator button next to the Inactive Navigation Indicator, Estimated Distance and Time display, that stage of your route will be displayed as a 2D aerial map view.

In Map View tap Favorites in the Last Page Accessed field on the Control Bar to go back to the Route Details Display bar on the Route

page. Scroll down the Route page to the Options bar where you can make the favorite route your current route by tapping Set as Current Route.

You can remove the displayed route from your favorites by tapping Remove on the Options bar.

Tap on any Location on the Route page to access its Location Details / Route Planning and Options page.

## Using History

Getting to the Destinations and Trip Log Pages

Go Main Menu ➝ History ➝ Destinations
Go Main Menu ➝ History ➝ Destinations ➝ Right tab ➝ Trip Log

Using Destinations

View a list of all your destinations for the last 30 days. Tap on any destination Location to access its Location Details / Route Planning and Options page.

Using the Trip Log
The Current Trip bar shows you how far, long and the average speed at which you've travelled on your current trip.

The Trips bar lists (up to the past 30 days) the dates of your trips as Trip Date buttons that you can tap that will takes you each specific Trip Date Details page. Your total travelled distance and average speed for that date are displayed on the Trip Date button as well.
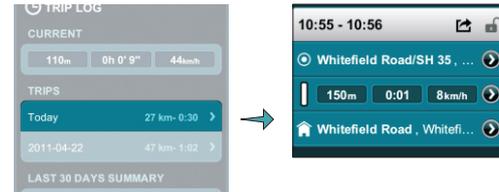

Tap on any Trip Date button to go to that date's Trip Date Details page where you can view Individual Trip Time bars. You can lock any trip by tapping the Lock button. This will keep the locked trip in your Trip Log while the other, unlocked ones, are erased automatically after 30 days. Tap on any Location or Route to view it's Location Details / Route Planning and Options page.

The Export as KML Button

The Trip Time Bar

The Lock Button

Export any trip as a KML file by tapping the Export as KML button. You can delete all of your Trip Logs, except of course the ones you've previously locked, by tapping Delete All Logs.

Please refer to pages 29–40 to view how to use the Location Details / Route Planning and Options page.

MapmyIndia Maps End User License Agreement

This End-User License Agreement (EULA) is a legal agreement between you (either an individual or a single entity) and CE INFO SYSTEMS PVT. LIMITED for the digital maps database and updates hereof that run navigation in associated hardware collectively the "MapmyIndia Maps" or "Maps"). By installing or using the MapmyIndia Maps, you agree to be bound by the terms of this Agreement. Use of the Maps without acceptance of this Agreement is unauthorized and not permitted.

1. License Grant. CE INFO SYSTEMS PVT LIMITED grants you a non-exclusive license to use your purchased copy of the MapmyIndia Maps for your own purposes of accessing the map database and navigation by running the associated hardware and not for service bureau time-sharing, or other similar purposes.

2. Limitations On Use. You are not permitted to copy, modify, decompile, disassemble, or reverse engineer any portion of the Maps.

3. Indemnity. You agree to indemnify, defend and hold free and harmless CE INFO SYSTEMS PVT LIMITED, including its licensors, assignees, subsidiaries, affiliated companies, and the respective officers, directors, employees, shareholders, agents, authorized dealers or sales agents, and representatives of each of them from and

against any liability, loss, injury, demand, cost, expense, or claim of any kind of character, including but not limited to attorney's fees, arising out of (a) any use or possession of the Maps, or (b) any breach of any warranties or representations made by you in this Agreement or of your obligations under this Agreement.

4. Disclaimer of Warranty. CE INFO SYSTEMS PVT LIMITED does not make any warranties or representations, either express or implied, with respect to the Maps, without limiting the foregoing, CE INFO SYSTEMS PVT. LIMITED expressly disclaims any implied warranties of quality, performance, merchantability, fitness for a particular purpose or non-infringement.

5. Limitation of Liability. CE INFO SYSTEMS PVT LIMITED shall not be held responsible for any actual, anticipated or speculative loss of profit or direct, indirect, incidental, special, or consequential damages, including, without limitation, loss of revenue, data, or use incurred by you or any third party arising out of your use or possession of the Maps, whether in an action in contract or tort or based on a warranty, even if CE INFO SYSTEMS PVT. LIMITED has been advised of the possibility of such damages.

6. Warnings.

A. Copies of the Maps reflect conditions as they existed at various points in time before your receipt of such copies. Accordingly, copies of the Maps may contain inaccurate or incomplete data or information due to inaccurate or incomplete source materials, the passage of time, road construction, changing conditions, and otherwise.

B. Neither the Maps nor the Software include, analyze, process, consider or reflect any of the following categories of information, i.e., neighborhood quality or safety; population density; availability or proximity of law enforcement, emergency, rescue, medical or other assistance; construction work, zones, or hazards; road and lane closures; various legal restrictions (such as vehicular type, weight, load, height and speed restrictions); road slope or grade; bridge height, width, weight or other limits; road, traffic or traffic facilities safety or conditions; weather conditions; pavement characteristics or conditions; special events; traffic congestion; or travel time.
C. Maps are strictly meant for use in India and you are not allowed to export Maps or its copies anywhere outside India.

7. Transfer. This Agreement, including all rights, obligations and representations may be transferred to another individual or single entity, provided the same transfer includes the simultaneous transfer of the associated hardware in which the Maps are installed, and further provided that such other individual or single entity accepts all the terms of this Agreement. In the event such individual or single entity to which the Software is transferred does not accept the terms of this agreement, then the License herein automatically terminates. Further use of the Maps is unauthorized and not permitted.

8. Governing Law. This Agreement shall be governed by the laws of India without giving effect to its conflict of laws provisions.
